Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Full-stack engineer and two-time founder/CTO with seven years of production software. I build state-heavy React apps on Node.js services: real-time trading UIs, live charts and dashboards, a Next.js app on NestJS with live WebSocket updates, and a license-usage analytics dashboard. TypeScript, React, Node.js, SQL.

SKILLS AND PROFILES

Skills : React | TypeScript | State Management | Node.js / NestJS | Next.js | SQL | Postgres
Data Visualization | Real-Time UIs / WebSockets | Dashboards | Browser Extensions | Testing / CI | Go | Claude Code / Cursor
Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC Remote
Lead Engineer (Contractor) March 2026 – September 2026

- Go data gateway for third-party apps (scoped, revocable tokens) that grew into an app store: template registry, per-app data storage, 3-way merge for template updates
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run
- Worked agentic-first (Claude Code, Cursor) on every part of the stack, with tests gating each release

Ralli Remote
Founder / CTO January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing
- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server
- Shipped friends, leaderboards, notifications, and referrals to drive engagement and growth

Independent Engineer Remote
Founder / Freelance Engineer, startups October 2021 – December 2024

- Real-time front ends: DEX trading UI for Cypher, live price charts for Tsunami Finance, dashboards for Clockwork
- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Lancer: GitHub app and browser extension linking bounties to pull requests; a linked PR closing paid its author from escrow
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise

Applied Intuition Mountain View, CA
Software Engineer July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

EDUCATION

A. James Clark School of Engineering, University Of Maryland **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude
