Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Product engineer and two-time founder/CTO with seven years of production software. I ship AI features and growth loops end to end in TypeScript, Node.js and React: agent tools and a tiered agent runtime, voice messaging, and friends, leaderboards, notifications and referrals. Measure, then ship.

SKILLS AND PROFILES

Skills : TypeScript | React / Next.js | Node.js / NestJS | LLM Features / Agents | Tool Calling | Evals | Growth Features | Product UI | Postgres | Analytics Dashboards | Git / Code Review | CI/CD | Go | Python

Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC — Remote

Lead Engineer (Contractor) — March 2026 – September 2026

- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- Go data gateway for third-party apps (scoped, revocable tokens) that grew into an app store: template registry, per-app data storage, 3-way merge for template updates
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run

Ralli — Remote

Founder / CTO — January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing
- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server
- Shipped friends, leaderboards, notifications, and referrals to drive engagement and growth

Independent Engineer — Remote

Founder / Freelance Engineer, startups — October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Real-time front ends: DEX trading UI for Cypher, live price charts for Tsunami Finance, dashboards for Clockwork

Applied Intuition — Mountain View, CA

Software Engineer — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

EDUCATION

A. James Clark School of Engineering, University Of Maryland — **GPA: 3.93**

Bachelor of Science in Computer Engineering, University Honors, Cum Laude
