# Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

## SUMMARY

Customer-facing engineer and two-time founder/CTO with seven years of production software. I build retrieval and LLM systems hands-on (vector search and RAG, fine-tuned models on vLLM, agent tools) and have scoped and delivered work directly with clients and founders. Python, SQL, TypeScript, Go.

## SKILLS AND PROFILES

**Skills** : Vector Search / RAG | LLM Applications | SQL | Postgres | ETL / Data Pipelines | Solution Design | Technical Demos | Customer-Facing Delivery | Python | TypeScript | Go | Docker | AWS / GCP | CI/CD

**Profiles** : LinkedIn jack-sturtevant | Github jacksturt

## EXPERIENCE

**Coordinator, LLC** — Remote

*Lead Engineer (Contractor)* — March 2026 – September 2026

- Go data gateway for third-party apps (scoped, revocable tokens) that grew into an app store: template registry, per-app data storage, 3-way merge for template updates
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- Multi-sport LLM fine-tuning on H100s: corpus curation, feedback-retraining loop, quantized vLLM serving
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run

**Ralli** — Remote

*Founder / CTO* — January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing

**Independent Engineer** — Remote

*Founder / Freelance Engineer, startups* — October 2021 – December 2024

- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability

**Applied Intuition** — Mountain View, CA

*Software Engineer* — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

## EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

## EDUCATION

**A. James Clark School of Engineering, University Of Maryland** — **GPA: 3.93**

*Bachelor of Science in Computer Engineering, University Honors, Cum Laude*
