Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SKILLS AND PROFILES

Skills : Python | TypeScript | Go | LLM / Agentic Tooling | RAG & Vector Search | REST APIs | CI/CD | Docker | Kubernetes | AWS | Postgres | Technical Leadership | Git

Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC — Remote
Lead Engineer (Contractor) — March 2026 – September 2026

- Go data-access gateway for third parties (scoped, revocable tokens) that evolved into an app store: template registry, per-app data storage, 3-way merge reconciliation for template updates
- Self-hosted GPU voice pipeline (Whisper STT; benchmarked and swapped TTS engines for latency and compatibility), later shipped as production voice messaging (STT/TTS via OpenRouter) in the web app
- Multi-sport LLM fine-tuning pipeline (football, basketball, hockey, golf, endurance) on H100 GPUs: corpus curation, two-layer training architecture, continuous feedback-retraining loop, quantization for vLLM serving
- Built self-hosted CI/CD infrastructure for the end-to-end test suite: serial vs. parallel job split, switched LLM backend to cut per-run cost
- Video/VLM pipeline: Qwen3-VL and Cosmos-Reason2 inference for at-the-snap play/formation detection; iteratively tuned confidence thresholds and frame preprocessing; clip/frame storage on MinIO + Postgres, plus swing-video pose-estimation analysis

Ralli — Remote
Founder / CTO — January 2025 – October 2025

- Led a team building out the platform; scaled from part-time to full-time (July 2025)
- Founded a real-time social sports betting platform; built the original pipeline ingesting betting lines and athlete/roster data from ESPN's public APIs on a 12-hour cron, later extended by the team
- Built core backend domain services (games, matchups, users, lines) on NestJS with Drizzle/Postgres

Applied Intuition — Mountain View, CA
Software Engineer — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard demonstrating client product usage trends
- Improved average customer support response time from > 1 day to < 1 hour through creation, automation, and maintenance of custom Zendesk solution
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees

Independent Software Consultant — Remote
Founder / Contract Engineer, early-stage ventures — October 2021 – December 2024

- Founder / CTO of Lancer (2022 – October 2023): Solana freelance platform with escrowed smart-contract payments and a 7-person team; won $30,000 at the Grizzlython Hackathon
- ML Engineer at Trustless Engineering (April 2024): built Kubernetes deployments (ArgoCD) and ML infrastructure, with Datadog for observability

Hydraze, Inc — College Park, MD
Chief Technology Officer — January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for automated facilities data collection and a management platform to view device and usage data

Amazon Web Services — Seattle, WA
SDE Intern — May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

EDUCATION

A. James Clark School of Engineering, University Of Maryland — **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
