# Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

## SUMMARY

Full-stack engineer and two-time founder/CTO with seven years of building checkout-style flows where money moves: escrowed payments with ACH payouts, quotes, and checkpoints; a trading platform built in eight weeks; and a license dashboard that helped close multimillion-dollar deals. I set technical direction on small teams and ship incrementally. TypeScript, React, Node.js, Go, Postgres.

## SKILLS AND PROFILES

**Skills** : TypeScript | React / Next.js | Node.js / NestJS | Postgres | Payments / Checkout Flows | Billing Integrations | API Design
Go | Python | Technical Leadership | Observability / Datadog | CI/CD | Docker | AWS / GCP
**Profiles** : LinkedIn jack-sturtevant | Github jacksturt

## EXPERIENCE

**Coordinator, LLC** Remote
*Lead Engineer (Contractor)* March 2026 – September 2026

- Go data gateway for third-party apps (scoped, revocable tokens) that grew into an app store: template registry, per-app data storage, 3-way merge for template updates
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- Agent runtime (Python): group-scoped memory pruning, voice-agent memory, reviewed-turn training-data pipeline

**Ralli** Remote
*Founder / CTO* January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built NestJS/Drizzle/Postgres domain services (games, matchups, lines, friends, leaderboards, notifications) with live WebSocket updates and Datadog tracing
- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server
- Shipped friends, leaderboards, notifications, and referrals to drive engagement and growth

**Independent Engineer** Remote
*Founder / Freelance Engineer, startups* October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO; escrowed payments with ACH payouts (Coinflow), quotes, checkpoints, in-app messaging; led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Lancer: GitHub app and browser extension linking bounties to pull requests; a linked PR closing paid its author from escrow
- Real-time front ends: DEX trading UI for Cypher, live price charts for Tsunami Finance, dashboards for Clockwork

**Applied Intuition** Mountain View, CA
*Software Engineer* July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

**Hydraze, Inc** College Park, MD
*Chief Technology Officer* January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for facilities data collection, plus a device/usage management platform

**Amazon Web Services** Seattle, WA
*SDE Intern* May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

## EDUCATION

**A. James Clark School of Engineering, University Of Maryland** **GPA: 3.93**
*Bachelor of Science in Computer Engineering, University Honors, Cum Laude*

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
