Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Full-stack engineer and two-time founder/CTO with seven years of production software: REST APIs and backend services, React front ends, containerized GPU inference, and device-management platforms. Python, TypeScript/Node.js, Go, Postgres.

SKILLS AND PROFILES

Skills : Python | TypeScript / Node.js | REST APIs | React / Next.js | NestJS | Go | SQL / Postgres
Docker | Kubernetes (ArgoCD deploys) | AWS / GCP | CI/CD | Datadog | WebSockets | GPU Inference (vLLM)
Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC Remote
Lead Engineer (Contractor) March 2026 – September 2026

- Go data gateway for third-party apps: scoped, revocable tokens, rate limits, audit log, and per-app data storage
- Containerized CV service for All-22 football film: async job tracker, results in Postgres, clips in object storage, YOLOv8-pose on GPU
- Served quantized fine-tuned LLMs with vLLM on H100s; wrote FP8/FP4/INT4 quantization and a feedback-retraining loop
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Moved GPU voice services (Whisper, TTS) to ARM64 NVIDIA hardware, then shipped voice messaging in the web app
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge

Ralli Remote
Founder / CTO January 2025 – October 2025

- Founded a real-time social sports betting platform and led the engineering team (full-time from July 2025)
- Built a Next.js app and NestJS/Drizzle/Postgres services with live WebSocket updates and Datadog tracing
- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data

Independent Engineer Remote
Founder / Freelance Engineer, startups October 2021 – December 2024

- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise

Applied Intuition Mountain View, CA
Software Engineer July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network (Raspberry Pi + Arduino) and device-management platform
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- C++ / CUDA (college and early career, about 5 years ago): robotics and ML projects, including senior-year research
- Harvard medical lab (first job): worked on early lab-on-a-chip experiments

EDUCATION

A. James Clark School of Engineering, University Of Maryland **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude
