# Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

## SUMMARY

Engineer with seven years of building data pipelines and owning the services I run: ETL into Postgres, a license-usage dashboard that helped close multimillion-dollar deals, NestJS services with Datadog tracing, and a Go data gateway with rate limits and an audit log. Go, Python, TypeScript, SQL.

## SKILLS AND PROFILES

**Skills** : Go | Python | SQL / Postgres | Data Pipelines / ETL | Usage Metrics / Dashboards | TypeScript | Observability / Datadog CI/CD | Docker | Kubernetes / ArgoCD (2024) | Cost Optimization | On-call / Production | AWS | GCP
**Profiles** : LinkedIn jack-sturtevant | Github jacksturt

## EXPERIENCE

**Coordinator, LLC** Remote
*Lead Engineer (Contractor)* March 2026 – September 2026

- Go data gateway for third-party apps: scoped, revocable, device-bound tokens, refresh-reuse rejection, rate limits, audit log
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run
- Agent runtime (Python): group-scoped memory pruning, voice-agent memory, reviewed-turn training-data pipeline
- Grew the gateway into an app store: template registry, per-app data storage, 3-way merge for template updates
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts

**Ralli** Remote
*Founder / CTO* January 2025 – October 2025

- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data
- Built NestJS/Drizzle/Postgres domain services (games, matchups, lines, friends, leaderboards, notifications) with live WebSocket updates and Datadog tracing
- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server

**Independent Engineer** Remote
*Founder / Freelance Engineer, startups* October 2021 – December 2024

- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Lancer: GitHub app and browser extension linking bounties to pull requests; a linked PR closing paid its author from escrow

**Applied Intuition** Mountain View, CA
*Software Engineer* July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

**Hydraze, Inc** College Park, MD
*Chief Technology Officer* January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for facilities data collection, plus a device/usage management platform

**Amazon Web Services** Seattle, WA
*SDE Intern* May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

## EDUCATION

**A. James Clark School of Engineering, University Of Maryland** **GPA: 3.93**
*Bachelor of Science in Computer Engineering, University Honors, Cum Laude*

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
