# Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

## SUMMARY

Engineer and two-time founder/CTO with seven years of building production software and integrations, much of it close to customers. Built customer-facing tools and support automation at Applied Intuition, and most recently agent tools, scoped-access integrations, and model-tier measurements for a production LLM product. Python, TypeScript, Go. Based in Utah (Mountain Time).

## SKILLS AND PROFILES

**Skills** : Python | TypeScript | Go | LLM Agents & Tool Use | Prompting / Evals | Workflow Automation | API Integrations | Scoped Auth / Audit Logs | Support Automation | Postgres | Docker | AWS / GCP | CI/CD | Datadog

**Profiles** : LinkedIn jack-sturtevant | Github jacksturt

## EXPERIENCE

**Coordinator, LLC** — Remote
*Lead Engineer (Contractor)* — March 2026 – September 2026

- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Data gateway with scoped, revocable, device-bound tokens, refresh-reuse rejection, rate limits, audit log; 28 tests
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Agent runtime (Python): group-scoped memory pruning, voice-agent memory, reviewed-turn training-data pipeline
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run

**Ralli** — Remote
*Founder / CTO* — November 2024 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing
- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data
- Wrote on-chain bet-submission and line-resolution programs (Rust/Anchor); integrated embedded wallets

**Independent Engineer** — Remote
*Founder / Freelance Engineer, startups* — October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO of a Solana escrow freelance platform; led 7 people; won $30K at Grizzlython
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Particles, Cherry Labs, Cypher: on-chain raffles (3,500+ tickets sold), GPU-rental marketplace, trading UIs

**Applied Intuition** — Mountain View, CA
*Software Engineer* — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees

**Hydraze, Inc** — College Park, MD
*Chief Technology Officer* — January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for facilities data collection, plus a device/usage management platform

**Amazon Web Services** — Seattle, WA
*SDE Intern* — May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

## EDUCATION

**A. James Clark School of Engineering, University Of Maryland** — **GPA: 3.93**
*Bachelor of Science in Computer Engineering, University Honors, Cum Laude*

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
