Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Full-stack engineer and two-time founder/CTO with seven years of production software. Most recently built agent tools with exact tool contracts, tuned the prompts and tiers behind a production LLM product, and shipped voice (STT/TTS); I use Claude Code daily. Python, TypeScript, Go.

SKILLS AND PROFILES

Skills : Python | TypeScript / JavaScript | Tool Definitions / Contracts | Prompt Tuning | Evals | Coding Agents (Claude Code) | Voice (STT / TTS)
Developer APIs | Scoped Auth / API Tokens | React / Next.js | Go | Postgres | CI/CD | Technical Writing
Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC Remote
Lead Engineer (Contractor) March 2026 – September 2026

- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- Data gateway with scoped, revocable, device-bound tokens, refresh-reuse rejection, rate limits, audit log; 28 tests
- Agent runtime (Python): group-scoped memory pruning, voice-agent memory, reviewed-turn training-data pipeline
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run

Ralli Remote
Founder / CTO November 2024 – October 2025

- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing
- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data
- Wrote on-chain bet-submission and line-resolution programs (Rust/Anchor); integrated embedded wallets

Independent Engineer Remote
Founder / Freelance Engineer, startups October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Particles, Cherry Labs, Cypher: on-chain raffles (3,500+ tickets sold), GPU-rental marketplace, trading UIs

Applied Intuition Mountain View, CA
Software Engineer July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees

Hydraze, Inc College Park, MD
Chief Technology Officer January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for facilities data collection, plus a device/usage management platform

Amazon Web Services Seattle, WA
SDE Intern May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

EDUCATION

A. James Clark School of Engineering, University Of Maryland **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
