Hello BILL Team,

I'm applying for the Staff Business Systems Analyst role knowing it's a real stretch. I haven't worked in Oracle ERP Cloud, haven't supported a finance close or an R2R, P2P, or O2C process, and haven't worked with SOX audits. You should weigh that first.

My experience is on the engineering side of the same work: learning what a business team needs, then building and supporting the system. At Applied Intuition I built an intranet for managing developers, teams, and customers, a license dashboard that helped close multiple million-dollar deals, and an automated Zendesk solution that took support response times from over a day to under an hour. At Lancer I built escrowed payments with ACH payouts, so I have worked with money movement and its failure cases.

If that kind of background is useful on the systems or integration side, I'd be glad to talk.
