Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Backend engineer and two-time founder/CTO with seven years of production software. I work with AI provider APIs daily and have built usage controls into my services: switching LLM backends to cut cost per run, rate limits and audit logs in a Go data gateway, and payments flows at two startups. Go, TypeScript, Python.

SKILLS AND PROFILES

Skills : AI Provider APIs | LLM Cost / Usage Tradeoffs | Rate Limits / Usage Controls | Audit Logging | Payments | Backend Services | Go
Python | TypeScript / NestJS | Postgres | SQL | CI/CD | Datadog | AWS / GCP
Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC Remote
Lead Engineer (Contractor) March 2026 – September 2026

- Data gateway with scoped, revocable, device-bound tokens, refresh-reuse rejection, rate limits, audit log; 28 tests
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app

Ralli Remote
Founder / CTO January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built NestJS/Drizzle/Postgres domain services (games, matchups, lines, friends, leaderboards, notifications) with live WebSocket updates and Datadog tracing
- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data

Independent Engineer Remote
Founder / Freelance Engineer, startups October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO; escrowed payments with ACH payouts (Coinflow), quotes, checkpoints, in-app messaging; led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability

Applied Intuition Mountain View, CA
Software Engineer July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

EDUCATION

A. James Clark School of Engineering, University Of Maryland **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude
