Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Engineer who builds how other engineers ship, and two-time founder/CTO with seven years of production software. I built self-hosted CI/CD for an end-to-end suite, Turborepo monorepo builds, GitOps deployments, and LLM-powered developer tooling: Go agent tools and an agentic-first workflow. Go, TypeScript, Python.

SKILLS AND PROFILES

Skills : Developer Experience | Build Systems / Monorepos | CI/CD | Dependency Management (npm) | AI-Assisted Dev Tools | LLM-Powered Tooling | Go
TypeScript | Python | Java (earlier, not recent) | GitOps (ArgoCD) | Docker | Technical Leadership | AWS / GCP
Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC Remote
Lead Engineer (Contractor) March 2026 – September 2026

- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Worked agentic-first (Claude Code, Cursor) on every part of the stack, with tests gating each release
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Go data gateway for third-party apps: scoped, revocable, device-bound tokens, refresh-reuse rejection, rate limits, audit log

Ralli Remote
Founder / CTO January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing

Independent Engineer Remote
Founder / Freelance Engineer, startups October 2021 – December 2024

- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise

Applied Intuition Mountain View, CA
Software Engineer July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

EDUCATION

A. James Clark School of Engineering, University Of Maryland **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude
