TEACHING AREAS AND PROFILES

Teaching Areas : Full-Stack Web Development | Software Design & Architecture | Microservices | Python | SQL / Postgres Git / GitHub | Testing & QA | CI/CD | Docker / Kubernetes | Agile Team Leadership | AI / ML | Embedded / IoT
Profiles : LinkedIn jack-sturtevant | Github jacksturt

TEACHING EXPERIENCE

Turbin3 Remote
Head of Special Projects May 2024 – July 2025

- Guest lectures at MIT, USC, and Deree College (Athens, Greece)
- Builders 101: taught Solana blockchain fundamentals; each student designed and built a custom project to completion to demonstrate mastery
- Advanced Solana: led a deep dive into validator internals and network-wide coordination
- Elites: selected the strongest engineers from Builders 101 and Advanced Solana and taught the product and soft skills of working as a founding software team; that cohort became the engineering team behind Ralli

INDUSTRY EXPERIENCE

Coordinator, LLC Remote
Lead Engineer (Contractor) March 2026 – September 2026

- Built self-hosted CI/CD for the end-to-end test suite: serial vs. parallel job split, cheaper LLM backend per run
- Designed a data-access gateway (scoped, revocable tokens) that grew into an app store with 3-way merge template updates
- LLM fine-tuning pipeline on H100 GPUs (feedback retraining, vLLM serving), plus voice (Whisper) and video/VLM pipelines

Ralli Remote
Founder / CTO January 2025 – October 2025

- Led the engineering team (the Turbin3 Elites cohort) building a real-time fantasy sports and social betting platform
- Designed the data model and ETL pipelines loading live betting lines and rosters from ESPN's APIs into Postgres (Supabase)

Independent Software Consultant Remote
Founder / Contract Engineer, early-stage ventures October 2021 – December 2024

- Led engineering for multiple early-stage startups: full-stack web development and small team leadership
- ML Engineer at Trustless Engineering (April 2024): built Kubernetes deployments (ArgoCD) and ML infrastructure, with Datadog for observability

Applied Intuition Mountain View, CA
Software Engineer July 2020 – October 2021

- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Helped close multiple million dollar deals with a license dashboard showing client product usage trends
- Cut average customer support response time from > 1 day to < 1 hour by building and automating a custom Zendesk solution

Hydraze, Inc College Park, MD
Chief Technology Officer January 2019 – July 2020

- Built an embedded IoT sensor network (Raspberry Pi + Arduino) and a management platform for device and usage data

Amazon Web Services Seattle, WA
SDE Intern May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

EDUCATION

A. James Clark School of Engineering, University Of Maryland **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude *2020*

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
