# Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

## SUMMARY

Applied ML engineer and two-time founder/CTO with seven years of production software. I build and deploy models: LLM post-training on H100s with a feedback-retraining loop, FP8/FP4/INT4 quantization for vLLM serving, multimodal VLM pipelines, and agents that use them. Python, Go, SQL.

## SKILLS AND PROFILES

**Skills** : LLM Post-Training | Quantization (FP8 / FP4 / INT4) | Multimodal LLMs / VLMs | Agents | vLLM Serving | H100 / GPU Pipelines | Evals / Scoring Harnesses | Training-Data Pipelines | Python | Go | SQL / Postgres | Docker | CI/CD | AWS / GCP

**Profiles** : LinkedIn jack-sturtevant | Github jacksturt

## EXPERIENCE

**Coordinator, LLC** — Remote
*Lead Engineer (Contractor)* — March 2026 – September 2026

- Multi-sport LLM fine-tuning on H100s: corpus curation, feedback-retraining loop, quantized vLLM serving
- Served quantized fine-tuned LLMs with vLLM on H100s; wrote FP8/FP4/INT4 quantization and a feedback-retraining loop
- VLM video pipeline (Qwen3-VL, Cosmos-Reason2) for formation detection: tuned thresholds, scoring harness, MinIO + Postgres
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Agent runtime (Python): group-scoped memory pruning, voice-agent memory, reviewed-turn training-data pipeline

**Ralli** — Remote
*Founder / CTO* — January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing

**Independent Engineer** — Remote
*Founder / Freelance Engineer, startups* — October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability

**Applied Intuition** — Mountain View, CA
*Software Engineer* — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

## EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

## EDUCATION

**A. James Clark School of Engineering, University Of Maryland** — **GPA: 3.93**
*Bachelor of Science in Computer Engineering, University Honors, Cum Laude*
