Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Hands-on engineering lead and two-time founder/CTO with seven years of production software. I have led teams at three startups, including 7 people at Lancer, giving engineers direction and coaching while shipping code myself: Postgres data models, NestJS services, Go APIs, and LLM features.

SKILLS AND PROFILES

Skills : Engineering Leadership | Coaching / Mentoring | Hiring | Technical Direction | Delivery | TypeScript / Node.js | React / Next.js | Go | Python | Postgres | LLM Features | CI/CD | Datadog | Claude Code / Cursor
Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC — Remote
Lead Engineer (Contractor) — March 2026 – September 2026

- Go data gateway for third-party apps (scoped, revocable tokens) that grew into an app store: template registry, per-app data storage, 3-way merge for template updates
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Multi-sport LLM fine-tuning on H100s: corpus curation, feedback-retraining loop, quantized vLLM serving
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run
- Worked agentic-first (Claude Code, Cursor) on every part of the stack, with tests gating each release

Ralli — Remote
Founder / CTO — January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Designed the Postgres data model and ingestion cadence; built the betting-line and roster ETL pipeline from ESPN APIs
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing

Independent Engineer — Remote
Founder / Freelance Engineer, startups — October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability

Applied Intuition — Mountain View, CA
Software Engineer — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

EDUCATION

A. James Clark School of Engineering, University Of Maryland — **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude
