# Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

## SUMMARY

Backend and platform engineer and two-time founder/CTO with seven years of production software. I build internal tooling other engineers rely on: self-hosted CI/CD for an end-to-end suite, latency benchmarks that drove engine and agent-tier choices, and Kubernetes deployments with Datadog. Go, Python, TypeScript.

## SKILLS AND PROFILES

**Skills** : Backend / Platform Engineering | Developer Tooling | Benchmarking / Performance | CI/CD | Go | Python | TypeScript
Kubernetes (ArgoCD) | Docker | Observability (Datadog) | Postgres | AWS / GCP | AI-Assisted Workflows
**Profiles** : LinkedIn jack-sturtevant | Github jacksturt

## EXPERIENCE

**Coordinator, LLC** Remote
*Lead Engineer (Contractor)* March 2026 – September 2026

- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Operated self-hosted GPU services on Linux (Whisper STT, TTS engines, VLM inference); benchmarked and swapped engines on the data
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Worked agentic-first (Claude Code, Cursor) on every part of the stack, with tests gating each release

**Ralli** Remote
*Founder / CTO* January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Ran production on managed cloud services (Supabase Postgres) with Datadog tracing
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing

**Independent Engineer** Remote
*Founder / Freelance Engineer, startups* October 2021 – December 2024

- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise

**Applied Intuition** Mountain View, CA
*Software Engineer* July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

## EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

## EDUCATION

**A. James Clark School of Engineering, University Of Maryland** **GPA: 3.93**
*Bachelor of Science in Computer Engineering, University Honors, Cum Laude*
