Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Production-minded engineer and two-time founder/CTO with seven years of production software. I own what I ship: self-hosted CI/CD, Kubernetes deployments with ArgoCD, GPU services on Linux, and Datadog tracing on real-time services. Go, Python, TypeScript.

SKILLS AND PROFILES

Skills : Production Operations | Kubernetes (ArgoCD) | CI/CD | Infrastructure Automation | Observability (Datadog) | Linux | Docker | Go | Python | TypeScript | Postgres | AWS | GCP | Incident Response

Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC — Remote

Lead Engineer (Contractor) — March 2026 – September 2026

- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run
- Operated self-hosted GPU services on Linux (Whisper STT, TTS engines, VLM inference); benchmarked and swapped engines on the data
- Go data gateway for third-party apps: scoped, revocable, device-bound tokens, refresh-reuse rejection, rate limits, audit log
- Video storage and inference pipeline: clips and frames on MinIO with Postgres metadata, feeding VLM scoring
- Worked agentic-first (Claude Code, Cursor) on every part of the stack, with tests gating each release

Ralli — Remote

Founder / CTO — January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Ran production on managed cloud services (Supabase Postgres) with Datadog tracing
- Built NestJS/Drizzle/Postgres domain services with live WebSocket updates and Datadog tracing

Independent Engineer — Remote

Founder / Freelance Engineer, startups — October 2021 – December 2024

- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise

Applied Intuition — Mountain View, CA

Software Engineer — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

EDUCATION

A. James Clark School of Engineering, University Of Maryland — **GPA: 3.93**

Bachelor of Science in Computer Engineering, University Honors, Cum Laude
