Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Hands-on AI engineer and two-time founder/CTO with seven years of building production systems with customers. Most recently fine-tuned LLMs on H100s and served them quantized with vLLM, benchmarked and swapped self-hosted speech engines for latency, and measured agent tiers on real requests before shipping. Python, Go, TypeScript.

SKILLS AND PROFILES

Skills : vLLM Serving | Quantization | Fine-Tuning | Latency / Throughput Benchmarking | Model Evaluation | Agents & Tool Use | GPU / H100 Pipelines

Python | Go | TypeScript | Docker | Customer-facing Delivery | Postgres | AWS / GCP

Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC — Remote

Lead Engineer (Contractor) — March 2026 – September 2026

- Multi-sport LLM fine-tuning on H100s: corpus curation, feedback-retraining loop, quantized vLLM serving
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- VLM video pipeline (Qwen3-VL, Cosmos-Reason2) for formation detection: tuned thresholds, scoring harness, MinIO + Postgres
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Agent runtime (Python): group-scoped memory pruning, voice-agent memory, reviewed-turn training-data pipeline

Ralli — Remote

Founder / CTO — January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built NestJS/Drizzle/Postgres domain services (games, matchups, lines, friends, leaderboards, notifications) with live WebSocket updates and Datadog tracing
- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data
- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server

Independent Engineer — Remote

Founder / Freelance Engineer, startups — October 2021 – December 2024

- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Lancer: GitHub app and browser extension linking bounties to pull requests; a linked PR closing paid its author from escrow

Applied Intuition — Mountain View, CA

Software Engineer — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees

Hydraze, Inc — College Park, MD

Chief Technology Officer — January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for facilities data collection, plus a device/usage management platform

Amazon Web Services — Seattle, WA

SDE Intern — May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

EDUCATION

A. James Clark School of Engineering, University Of Maryland — **GPA: 3.93**

Bachelor of Science in Computer Engineering, University Honors, Cum Laude

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
