Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Engineering lead and two-time founder/CTO with seven years of production software and small-team leadership. Led engineering teams at three startups; built data ingestion into Postgres, analytics dashboards, data pipelines, and the CI/CD and containers to ship them. SQL, Python, TypeScript/React, Go.

SKILLS AND PROFILES

Skills : Team Leadership | SQL | Data Modeling | Postgres | ETL Pipelines | Python | TypeScript / React | Go | REST APIs | Docker | Kubernetes | CI/CD | AWS / GCP | Claude Code / Cursor
Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC — Remote
Lead Engineer (Contractor) — March 2026 – September 2026

- Data gateway for third-party apps: scoped, revocable tokens, rate limits, audit log, and per-app data storage
- Video data pipeline: clips and frames on MinIO with Postgres metadata, feeding model scoring and analysis
- Reviewed-turn training-data pipeline and feedback-retraining loop for fine-tuned LLMs served with vLLM on H100s
- Containerized GPU vision service with an async job tracker and results stored in Postgres
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge
- Worked agentic-first (Claude Code, Cursor) on every part of the stack, with tests gating each release

Ralli — Remote
Founder / CTO — January 2025 – October 2025

- Founded a real-time social sports betting platform; led the engineering team from part-time to full-time (July 2025)
- Designed the Postgres data model and ingestion cadence; built the betting-line and roster ETL pipeline from ESPN APIs
- Built a Next.js app and a dozen NestJS/Drizzle/Postgres modules with live WebSocket updates and Datadog tracing

Independent Engineer — Remote
Founder / Freelance Engineer, startups — October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, Postgres); led a 7-person team
- Banger (2024): interim CTO; built a trading platform with live price charts in 8 weeks; it led to a $250K raise
- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability

Applied Intuition — Mountain View, CA
Software Engineer — July 2020 – October 2021

- Built a license analytics dashboard showing client product-usage trends; it helped close multiple million dollar deals
- Developed (full stack) intranet for managing developers, teams, and customers
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

EARLY EXPERIENCE

- Hydraze (CTO, 2019 – 2020): IoT sensor network collecting facilities data, plus a platform to view device and usage data
- AWS (SDE Intern, 2019): enabled mathematical verification of AWS products through compilation from Dafny to Java
- Java and C++ (college and early career): learned to code on Java; C++ / CUDA for robotics and ML research

EDUCATION

A. James Clark School of Engineering, University Of Maryland — **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude
