Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Product engineer with seven years of building React/TypeScript interfaces and the shared components behind them, from early-stage products to a production LLM app. Two-time founder/CTO, used to working directly with designers and turning repeated product needs into reusable pieces. Daily user of AI coding tools who reviews what they produce. React, TypeScript, Next.js.

SKILLS AND PROFILES

Skills : React / Next.js | TypeScript | HTML / CSS | Reusable Components | Product UI Design Collaboration | AI-assisted Development | Node.js / NestJS | Postgres | API Design Real-time / WebSockets | Go | CI/CD | AWS / GCP

Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC — Remote
Lead Engineer (Contractor) — March 2026 – September 2026

- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- Go data gateway for third-party apps (scoped, revocable tokens) that grew into an app store: template registry, per-app data storage, 3-way merge for template updates
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run

Ralli — Remote
Founder / CTO — January 2025 – October 2025

- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server
- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built NestJS/Drizzle/Postgres domain services (games, matchups, lines, friends, leaderboards, notifications) with live WebSocket updates and Datadog tracing
- Integrated embedded wallets so users never handled seed phrases; wrote bet-submission and line-resolution programs (Rust/Anchor)

Independent Engineer — Remote
Founder / Freelance Engineer, startups — October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Real-time front ends: DEX trading UI for Cypher, live price charts for Tsunami Finance, dashboards for Clockwork
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Lancer: GitHub app and browser extension linking bounties to pull requests; a linked PR closing paid its author from escrow

Applied Intuition — Mountain View, CA
Software Engineer — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

Hydraze, Inc — College Park, MD
Chief Technology Officer — January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for facilities data collection, plus a device/usage management platform

Amazon Web Services — Seattle, WA
SDE Intern — May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

EDUCATION

A. James Clark School of Engineering, University Of Maryland — **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
