# Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

## SUMMARY

Engineer and two-time founder/CTO with seven years of building real solutions, including data pipelines, CI/CD, and AI agent tooling (agent tools, tier routing, a scoped-access gateway), and of explaining them to customers. Built a license-usage dashboard that helped close multimillion-dollar deals. Python, Go, TypeScript, SQL.

## SKILLS AND PROFILES

**Skills** : Technical Discovery | Demos / Prototypes | Solution Design | Data Pipelines / ETL | Workflow Orchestration | AI Agents / MCP | Access Control / Governance | Python | Go | TypeScript | SQL / Postgres | Docker | CI/CD | AWS / GCP

**Profiles** : LinkedIn jack-sturtevant | Github jacksturt

## EXPERIENCE

**Coordinator, LLC** — Remote
*Lead Engineer (Contractor)* — March 2026 – September 2026

- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Go data gateway for third-party apps: scoped, revocable, device-bound tokens, refresh-reuse rejection, rate limits, audit log
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Agent runtime (Python): group-scoped memory pruning, voice-agent memory, reviewed-turn training-data pipeline
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run

**Ralli** — Remote
*Founder / CTO* — January 2025 – October 2025

- Built the betting-line and roster ingestion pipeline (ESPN APIs) and live projections from play-by-play data
- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)
- Built NestJS/Drizzle/Postgres domain services (games, matchups, lines, friends, leaderboards, notifications) with live WebSocket updates and Datadog tracing
- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server

**Independent Engineer** — Remote
*Founder / Freelance Engineer, startups* — October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO of a freelance platform (Next.js, tRPC, Prisma, escrowed payments); led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Trustless Engineering (2024): Kubernetes deployments (ArgoCD), ML infrastructure, and Datadog observability
- Lancer: GitHub app and browser extension linking bounties to pull requests; a linked PR closing paid its author from escrow

**Applied Intuition** — Mountain View, CA
*Software Engineer* — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees

**Hydraze, Inc** — College Park, MD
*Chief Technology Officer* — January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for facilities data collection, plus a device/usage management platform

**Amazon Web Services** — Seattle, WA
*SDE Intern* — May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

## EDUCATION

**A. James Clark School of Engineering, University Of Maryland** — **GPA: 3.93**
*Bachelor of Science in Computer Engineering, University Honors, Cum Laude*

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
