Jack Sturtevant

jack@sturt.io | sturt.io | 508-951-0133

SUMMARY

Frontend-leaning full-stack engineer and two-time founder/CTO with seven years of shipping user-facing products, often with a company's first customers. I build React/Next.js interfaces and the APIs, data models, and authorization behind them. Most recently built scoped, revocable access for third-party apps and the tools an LLM agent used to act on a user's workspace.

SKILLS AND PROFILES

Skills : React / Next.js | TypeScript | Application State | Product UI | Node.js / NestJS | Postgres | API Design | Authorization | Go | tRPC | WebSockets | Agent Tool Use | Datadog | CI/CD
Profiles : LinkedIn jack-sturtevant | Github jacksturt

EXPERIENCE

Coordinator, LLC — Remote
Lead Engineer (Contractor) — March 2026 – September 2026

- Go data gateway for third-party apps: scoped, revocable, device-bound tokens, refresh-reuse rejection, rate limits, audit log
- Built agent tools (Go): workspace app write/edit tools and read-only cross-app data tools with exact tool contracts
- Grew the gateway into an app store: template registry, per-app data storage, 3-way merge for template updates
- Benchmarked self-hosted Whisper and TTS engines, then shipped production voice messaging (STT/TTS) in the web app
- Timed single-shot vs. agent-loop tiers on real requests; single-shot was 4-6x faster, so I added it as a fourth tier
- Built self-hosted CI/CD for the end-to-end suite: serial/parallel job split, runs on every release merge, cheaper per run

Ralli — Remote
Founder / CTO — January 2025 – October 2025

- Rebuilt the product as a Turborepo monorepo: a Next.js web app and a NestJS server
- Integrated embedded wallets so users never handled seed phrases; wrote bet-submission and line-resolution programs (Rust/Anchor)
- Built NestJS/Drizzle/Postgres domain services (games, matchups, lines, friends, leaderboards, notifications) with live WebSocket updates and Datadog tracing
- Founded a real-time social sports betting platform; led the engineering team (full-time from July 2025)

Independent Engineer — Remote
Founder / Freelance Engineer, startups — October 2021 – December 2024

- Lancer (2022 – 2023): founder/CTO; escrowed payments with ACH payouts (Coinflow), quotes, checkpoints, in-app messaging; led 7 people
- Banger (2024): interim CTO; built a tokenized-tweet trading platform end to end in 8 weeks, which led to a $250K raise
- Lancer: GitHub app and browser extension linking bounties to pull requests; a linked PR closing paid its author from escrow
- Real-time front ends: DEX trading UI for Cypher, live price charts for Tsunami Finance, dashboards for Clockwork

Applied Intuition — Mountain View, CA
Software Engineer — July 2020 – October 2021

- Helped close multiple million dollar deals through creation of a license dashboard showing client product usage
- Developed (full stack) intranet for managing developers, teams, and customers, vastly improving efficiency of all employees
- Cut average customer support response time from > 1 day to < 1 hour with a custom, automated Zendesk solution

Hydraze, Inc — College Park, MD
Chief Technology Officer — January 2019 – July 2020

- Built an IoT sensor network (Raspberry Pi + Arduino) for facilities data collection, plus a device/usage management platform

Amazon Web Services — Seattle, WA
SDE Intern — May 2019 – August 2019

- Enabled mathematical verification of AWS products through compilation from Dafny to Java, see Github

EDUCATION

A. James Clark School of Engineering, University Of Maryland — **GPA: 3.93**
Bachelor of Science in Computer Engineering, University Honors, Cum Laude

- QUEST : Honors program focused on business and technology collaboration for solving complex design challenges
